DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Hara.

As per claims 1 and 7, the claims merely require directing means for at least two of the modes. Hara discloses a refrigeration system comprising directing means 32 directing refrigerant flow alternatively through a circuit comprising compressor 31, condenser 38, reheat coil 33, expansion valve 34 and evaporator 35 (cooling mode of Hara which is equivalent to “cooling and enhanced dehumidification mode” of the present application) or a circuit comprising compressor 31, reheat coil 33, expansion valve 34 and evaporator 35 (heating mode of Hara which is equivalent to “heating and dehumidification mode” of the present application). As per claims 7 and 8, Hara further teaches sensing a desired mode of operation according to supply air temperature (step 1012) and operating the working fluid directing means 32 to provide a desired mode of operation (steps 1013 – 1015).

Allowable Subject Matter

Art Unit: 3744

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
